Grinder + Hammermill

Nothing beats a Rotochopper grinder for grinding junk pallets. Nothing beats a hammermill for producing fine texture wood fiber. Put them together, and you have a single-pass solution for animal bedding and short fiber fuels.

Starting at 300 combined horsepower, Rotochopper two-stage grinding systems can turn any volume of pallet scrap into fine texture wood products with unbeatable simplicity.

Which Rotochopper system is right for your volume of pallets? Contact us today to learn more.

WPA Annual Meeting
January 13-17, 2017
Rancho Las Palmas Resort & Spa
Rancho Mirage, CA

Start 2017 with the Western Pallet Association Annual Meeting in Palm Springs, January 13-17, 2017. You can expect an outstanding line-up of speakers on topical issues, exhibits, and plenty of time to network with old and new members at receptions, dinners, and golf. Registration will be online beginning October 1st.

Be An Auction Donor!

- **Purpose** - All auction income benefits “Nature’s Packaging - an international promotion dedicated to wood packaging,” which is co-sponsored by NWPCA, CWPCA, and WPA.

- **Entertaining** - Auctioneer is the entertaining Bill MacCauley, of John Rock, Inc. You’ve witnessed his talent at NWPCA meetings and at the WPA annual meeting last year.

- And it all happens during the annual meeting of the industry’s friendliest association.

  Need not be present to donate.
WPA Call to Auction!

Last January, the WPA Annual Meeting featured its inaugural charity auction. The highly successful event raised over $51,000 in support of Nature's Packaging, the joint (WPA, NWPCA and CWPCA) campaign to promote the sustainability benefits of wood packaging.

This year, WPA is pleased to announce that the highly entertaining Bill MacCauley of John Rock, a certified auctioneer and well known pallet industry figure, will once again host the activities.

In preparation for this event, WPA is calling upon members and friends to participate as auction donors. Greg Vipond, this year's auction chair, reports that donations worth over $8,000 have already been received. Much more is needed, however, and your support would be gratefully appreciated. Greg says that he will begin calling members next week.

Pledge your donation today by contacting the WPA office at 360 335-0208 or wpa@westernpallet.org.

Auction donors needed!

The second annual WPA Auction takes place this coming January at the 2017 WPA Annual Meeting.
Book your table now! Below, table top displays from previous WPA Annual Meetings.

SEPTEMBER 2016
WPA Launches
New Logo and Website

WPA has updated both its logo as well as its website. The new logo marks a transition from the traditional black wood grain WPA lettering to an eye-catching approach using white lettering inside of a green stylized unit load, resting on a brown pallet. WPA members may contact the WPA office to obtain the new logo or the Nature's Packaging logo for their website, business cards or other promotional material.

WPA also rolled out its new website in September. As with the fresh logo, the new site is attractive and uncluttered in appearance. It is easy to providing both new and returning visitors a useful experience, whether to find out about the upcoming Annual Meeting, the benefits of wood packaging, or other topics such as membership.
At right: Introducing the new WPA logo. Contact the WPA office to obtain it for your company.

Below: Presenting the new WPA website. To check it out, visit www.westernpallet.org.

reLogistics Services Opens 45th Facility

WPA-member reLogistics Services, a leader in reusable asset management services, has announced the opening of its new reverse logistics center (RLC) in Jacksonville, Florida. The new operation establishes the company’s 45th location.

The 33 dock door facility expands reLogistics’ network with other locations in the Texas, Louisiana, Georgia, Florida and Kentucky, and California markets. The new Jacksonville RLC will offer the ability for its key retail customers to process reusable transport packaging items like pallets, reusable plastic containers, reusable totes and trays 24 hours a day – seven days a week.

reLogistics employees will unload and process these items on behalf of their customers enabling them to focus on getting product to the consumer while freeing up their distribution center space and maximizing trailer capacity.

“We are proud to broaden our US footprint into the Northern Florida market with our new Jacksonville RLC,” stated Mike Hachtman, President, reLogistics Services. “It’s the perfect location to better enable us to meet the growing demands of our customers while maximizing customer backhauls and facilitating reusable transport packaging contributing to their sustainability objectives.”

According to Hachtman, the new RLC located at 2780 Lloyd Road Jacksonville, FL 32254 will employ 16 to 18 people in various warehouse positions.

Headquartered in Houston, Texas, reLogistics is the leading provider of warehouse and pallet management services. reLogistics supports customers at 45 locations, servicing more than 1,000 retail outlets. reLogistics processes more than 245,000 trailers including 73 million pallets and 53 million reusable totes annually.
WHY JOIN AN ASSOCIATION?

Associations are stronger than ever. By joining, you get members-only perks, exclusive advertising and networking opportunities, and a whole lot of exposure for yourself and your organization. Get on board with the Western Pallet Association and see the difference!

- Networking: It’s not just who you know, it’s who others know. Networking is powerful.
- Visibility: Stand out and get noticed in your market.
- Learning: Get a competitive edge over non-members with exclusive training opportunities on a variety of hot topics.
- Exclusive: Membership identifies you and your business as professionals in the materials handling business.
- Credibility: Raise your reputation through membership.
- Have a Voice: Gain a say in what happens in government through the Association advocacy efforts.

Join us!

Sign up online at www.westernpallet.org or call to learn about the benefits of membership today!
Benefits of WPA Membership

- Membership identifies you and your business as professionals in the materials handling business.
- Share in the strength of belonging to a group that is looking out for your best interests.
- WPA keeps its members informed of developments and trends in the materials handling industry as well as related supplier industries.
- WPA conducts meetings to bring members the latest ideas and concepts in manufacturing and management. Networking opportunities allow you to make new contacts and develop valuable resources, as well as benefit and profit from the collective knowledge of all the WPA members.
- Our monthly newsletter, Western Pallet Magazine, helps keep members informed of current events and trends and offers affordable advertising to its members.
- WPA’s website, www.westernpallet.org, provides fast access to our membership directory and other important Association information.
RM2 Enters Strategic Relationship to Return Production to North America

Composite pallet producer RM2 (LSE-AIM: RM2) has announced its entry into a strategic manufacturing agreement with Jabil for the mass production of the RM2 BLOCKpal pallet in Mexico. The agreement with Jabil, a global leader in digital manufacturing and supply chain solutions, will allow RM2 to scale production more efficiently to market demand. Initial production is expected to be deployed in Q1 2017. Pallets produced at the facility will be delivered to RM2’s customers in North America.

This agreement is complementary to the deal announced in April 2016 for the production of pallets by Zhenshi Holdings Groups Ltd in China, allowing RM2 to address more rapidly the growing volume demands of its clients. Production costs at the two facilities are expected to be similar. In early 2016, RM2 discontinued North American production, which it undertook at its plant in Ontario, Canada.

John Walsh, CEO of RM2, commented: “When we announced the contract manufacturing agreement with Zhenshi, we re-affirmed our commitment to production in North America. Today’s agreement means that RM2 will have a well-balanced manufacturing capability with efficient, low-cost and modern production bases in both Asia and North America. This will enable us to mitigate cost fluctuations and flex production more efficiently between two highly qualified contract manufacturers and better meet the demands of our customers.
“As previously stated, all production for 2017 is already earmarked to be deployed with our customers in North America. These deployments will include outright sales, rentals, and long term lease agreements. We will update the market with regards to the specifics of these deals throughout Q4.”

“In keeping with Jabil’s pledge to positively impact the world in which we live and operate by addressing climate change and increasing resiliency, we are pleased to collaborate with RM2 in producing an eco-responsible pallet, thereby bringing an environmentally friendly solution to the logistics and supply chain industry,” said Keith Cochran, Vice President, Jabil Global Business Units.

Jabil is an electronic product solutions company providing comprehensive electronics design, production and product management services to global electronics and technology companies. Offering complete product supply chain management from facilities in 28 countries, Jabil provides comprehensive, individualized-focused solutions to customers in a broad range of industries. Jabil common stock is traded on the New York Stock Exchange under the symbol, “JBL”. For more information, visit www.jabil.com.

RM2 Supports Montreal Protocol Amendment

Also in the news, RM2 USA and the RM2 Group have announced their support in an ambitious Montreal Protocol amendment, joining more than 65 companies and leaders from 100 plus Countries that are standing with the Obama Administration to demonstrate an ongoing commitment to climate action. The Montreal Protocol is an amendment to phase down HFCs, which could avoid a rise in the world’s temperature by 0.5°C by the end of the century. The phase down is one of the most significant steps the world can take now to deliver on the goals of the Paris Agreement.

Global Softwood Prices Have Trednd Higher

Demand for softwood lumber has gone up in many markets around the world in 2016, resulting in a substantial increase in global lumber trade. With very few exceptions, the major importing countries have imported more lumber during the first six months this year than they did during the same period in 2015, according to estimates by the Wood Resource Quarterly (WRQ). Higher demand and a weaker US dollar resulted in generally higher lumber prices (in US dollar terms) worldwide in the first half of 2016 than in the 1H/15.

Lumber markets – North America

Demand for softwood lumber in the US has expanded continually so far in 2016. During the first five months of 2016, lumber consumption was 14.2% higher than during the same period in 2015, according to WWPA. The increased demand was predominantly met with higher production by sawmills in the US South, a substantial rise in import volumes from Canada (up 40%) and incrementally more shipments from Europe. Lumber prices in the US have trended upward for most of 2016 with prices in August this year reaching their highest levels since early 2015.

Lumber markets – Northern Europe

Weaker currencies in the Nordic countries have resulted in more competitive prices for lumber in 2015 and 2016. Prices in 2016 are among the lowest they have been since 2005. Finland is on pace to increase export volumes for the seventh consecutive year in 2016. During the first five months, the export shipments were up almost 15% as compared to the same period in 2015. The biggest increases have been to non-European countries including Egypt, Japan, China and Saudi Arabia, reports the WRQ.

Lumber markets – China

Lumber import prices to China from the two major supplying countries, Russia and Canada, have converged during 2016. Last year in July, Canadian lumber was sold at a premium of almost $40/m3 over Russian lumber. Despite lower prices for Canadian lumber, the country has not gained any market share this year - rather the opposite. In 2016, Canadian supply has
counted for 26% of the total import volumes, while Russia’s share has been approximately 59%. Back in 2013, Canada was the major supplier and accounted for about 40% of the imports.

Lumber market – Japan

Housing starts in Japan have trended upward during the first six months of 2016 with wooden housing starts being 3.8% higher this year than during the same period in 2015. Demand for lumber has followed a similar trend. Higher demand for wood has partly been met by an increase in the importation of lumber with the biggest increases coming from Austria, Finland and Sweden. Prices for both imported and domestic lumber have not changed much in Yen terms over the past year, but with the strengthening Japanese currency, lumber prices in dollar terms have rapidly gone up since the beginning of the year.

Lumber market – Russia

The export shipments from Russia have continued to go up in 2016, with volumes during the first six months reaching 12% higher levels than in the same period in 2015. By far the biggest increases in exports have been to Asian markets. Very low production costs in Eastern Russia have resulted in major inroads for Russian sawmills in the Chinese market at the expense of primarily Canadian sawmills. Lumber export prices in Russia have declined the past few years, but not at the same rate as prices for sawlogs, and as a result sawmills in Siberia have become some of the most profitable sawmills in the world.

This has been an excerpt from the newly released market report Wood Resource Quarterly. For subscription to the full 52-page report, please visit www.woodprices.com
CHEP and IFCO Critical Partners for Kroger Zero Waste Success

CHEP and IFCO, member companies of the Brambles Group, announced the companies’ shared pallets and bulk containers and Reusable Plastic Containers (RPCs) have been identified by Kroger as critical to reducing waste in the company’s supply chain. The nation’s second largest retailer highlighted CHEP and IFCO in its 2016 Sustainability Report. By replacing more single-use packaging and platforms with reusables, Kroger aims to meet or exceed the United States Environmental Protection Agency’s zero waste threshold of 90% diversion from landfill in its facilities by 2020.

“Kroger is committed to being a positive force for change when it comes to sustainable business practices, and CHEP and IFCO play an important role in our effort to meet our zero waste goals and continuously improve the sustainability of our supply chain,” said Suzanne Walker-Lindsay, Kroger Director of Sustainability.

Kroger’s sustainability report states, “Kroger partners with CHEP and IFCO, which both contribute to global sustainability through their ‘shared’ business models of pooled pallets, bulk containers and reusable plastic containers (RPCs). These packaging solutions bring both operational efficiencies and environmental benefits. Compared with one-way packaging, reusable platforms and containers offer a lower carbon footprint, reduced water consumption and less waste.” In addition, Kroger notes its use of RPCs for fresh produce improved product quality and reduced waste by eliminating the use of more than 73,000 tons of waxed and corrugated boxes.
Goplasticpallets.com Launches One-Eighth Nestable Retail Pallet

Goplasticpallets.com, leading independent UK provider of plastic pallets, has launched Nest M1, which the company states is the first “one-eighth” retail pallet to the supply chain industry. Along with other fractional pallets, including half and quarter pallets, the eighth pallet is designed to optimize retail display opportunities.

Designed and produced by CABKA-IPS, the Nest M1 pallet is a small, lightweight, nestable pallet, ideal for point-of-sale and retail floor display. It offers special secure location points which allow product displays and sleeves can be safely and effortlessly fixed to the pallet. The Nest M1 is produced from HDPE.

The 400 x 300 mm pallet has a height of 140 mm. When empty, it stacks 60 pallets high, or 480 pallets per full euro footprint.

The Nest M1 pallet is available in the UK through Goplasticpallets.com.
Tulsa-based Greystone Logistics, Inc. reported record sales for fiscal year end May 31, 2016, attributed to sales to a plastic pallet rental provider.

Sales for the fiscal year ended May 31, 2016 were over $26 million compared to $22 million in fiscal year 2015, an 18.2% increase. Greystone’s sales to its major customer in the fiscal year 2016 were 41% of total sales compared to 51% in the prior year. Pallet sales to a new major pooling customer increased from zero to 15% of total sales in the fiscal year 2016. Greystone’s net income was $836,134 in the fiscal year 2016 compared to $609,569 in the fiscal year 2015.

Warren Kruger CEO stated, “We anticipate driving top line sales during the next fiscal year and will continue to be diligent and cognizant of our need to drive down costs of production through innovation, automation, and scale focusing on providing returns that our shareholders’ expect. Since last quarter’s announcement of a new machine, two additional new machines have been placed into production to accommodate growing demand for Greystone’s products. Much of this demand is for a newly designed pallet being manufactured and sold to a lease pool customer that rents the pallets.

Greystone states that it has the best-engineered injection molded pallet line in the world with innovative designs allowing superior racking strength, high coefficient of friction anti-skid solutions, proprietary freezer additives allowing for use in environments of -30 degrees Fahrenheit, and utilizing 100% recycled and recyclable plastic content.”
